Review

A PDF copy of this and other exercises can be found in the **Resources** tab.

Feel free to customize the colors of your "My Interests" web page by using a color picker, like this one: https://developer.mozilla.org/en-US/docs/Web/CSS/CSS_Colors/Color_picker_tool.

Here is another color picker tool you can use: http://www.w3schools.com/colors/colors_picker.asp.

Once you find a color you like, copy the six-digit hexadecimal number to use the color in your web page. Make sure you copy the pound sign as well, so that your CSS looks like this:

```
1 color: #3F3FBF;
```

Once you are done, don't forget to follow the discussion prompt and share your work with others!
