Styling a Web Page with CSS

Review

A PDF copy of this and other exercises can be found in the **Resources** tab.

Continue building your “My Interests” web page on CodePen (<http://codepen.io/>). Click your avatar icon at the top of the website and select “Pens” to find the web page you already started building.

1. **Make some text bold** to make it really stand out, drawing the reader’s attention.
2. **Emphasize some text** with italics to draw attention or format a the title of a book, movie, or newspaper.
3. **Experiment with nesting tags**—maybe you want to format a title within a bold heading.

Need help?

Be sure to reference our documentation page for HTML: <http://www.dukelearntoprogram.com/course1/doc/#basichtml>, also linked in the **Resources** tab.

Mark as completed
