

# Event-Driven Programming

## Introduction

# Why Interactivity?

- With HTML + CSS: create and style pages
  - Lots to learn, we've touched on basics
- Interactive web pages are widely used
  - Events (e.g. click buttons)
  - Change views: sorting, selecting, and more
  - New features part of HTML5
- Event-driven programming using JavaScript to create interactive pages

# Interactive Green Screen

- HTML + CSS + JavaScript =
  - Interactive web page
  - Upload images, create composite!

# Interactive Green Screen

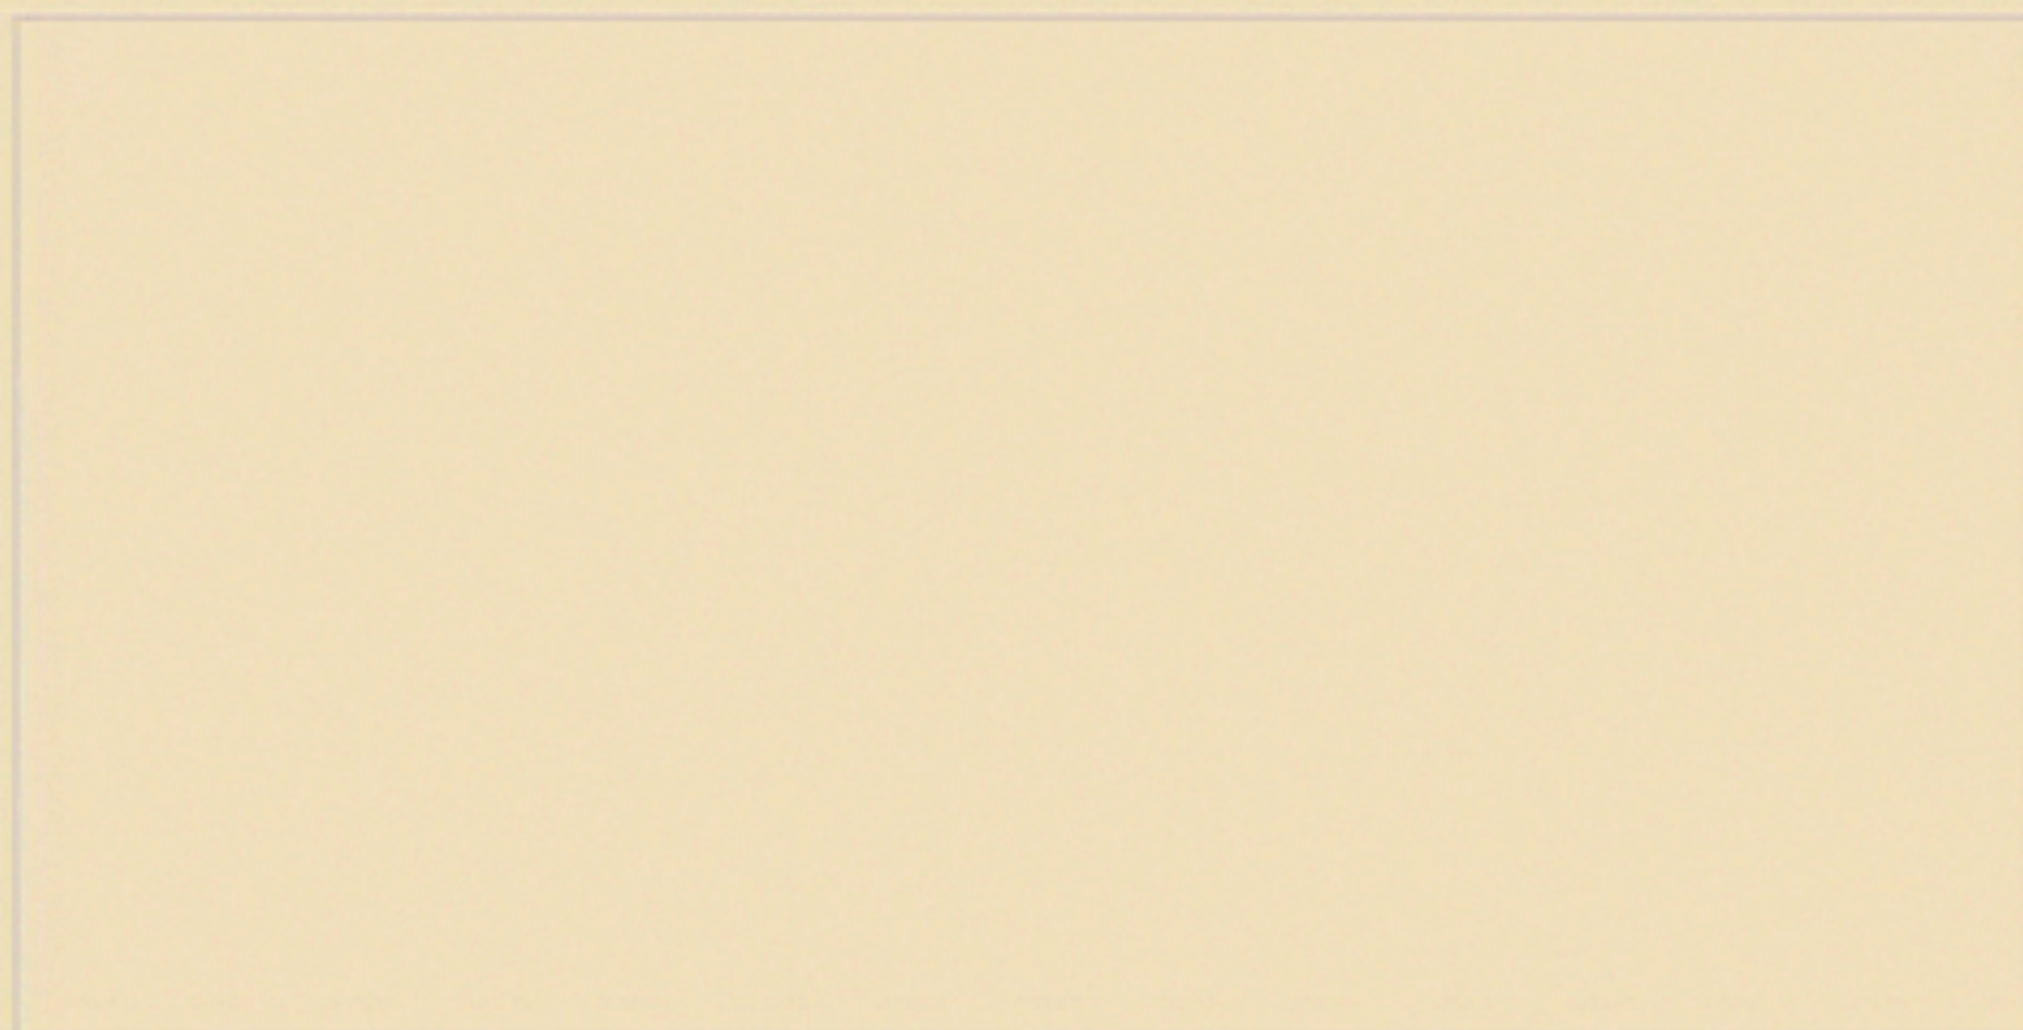

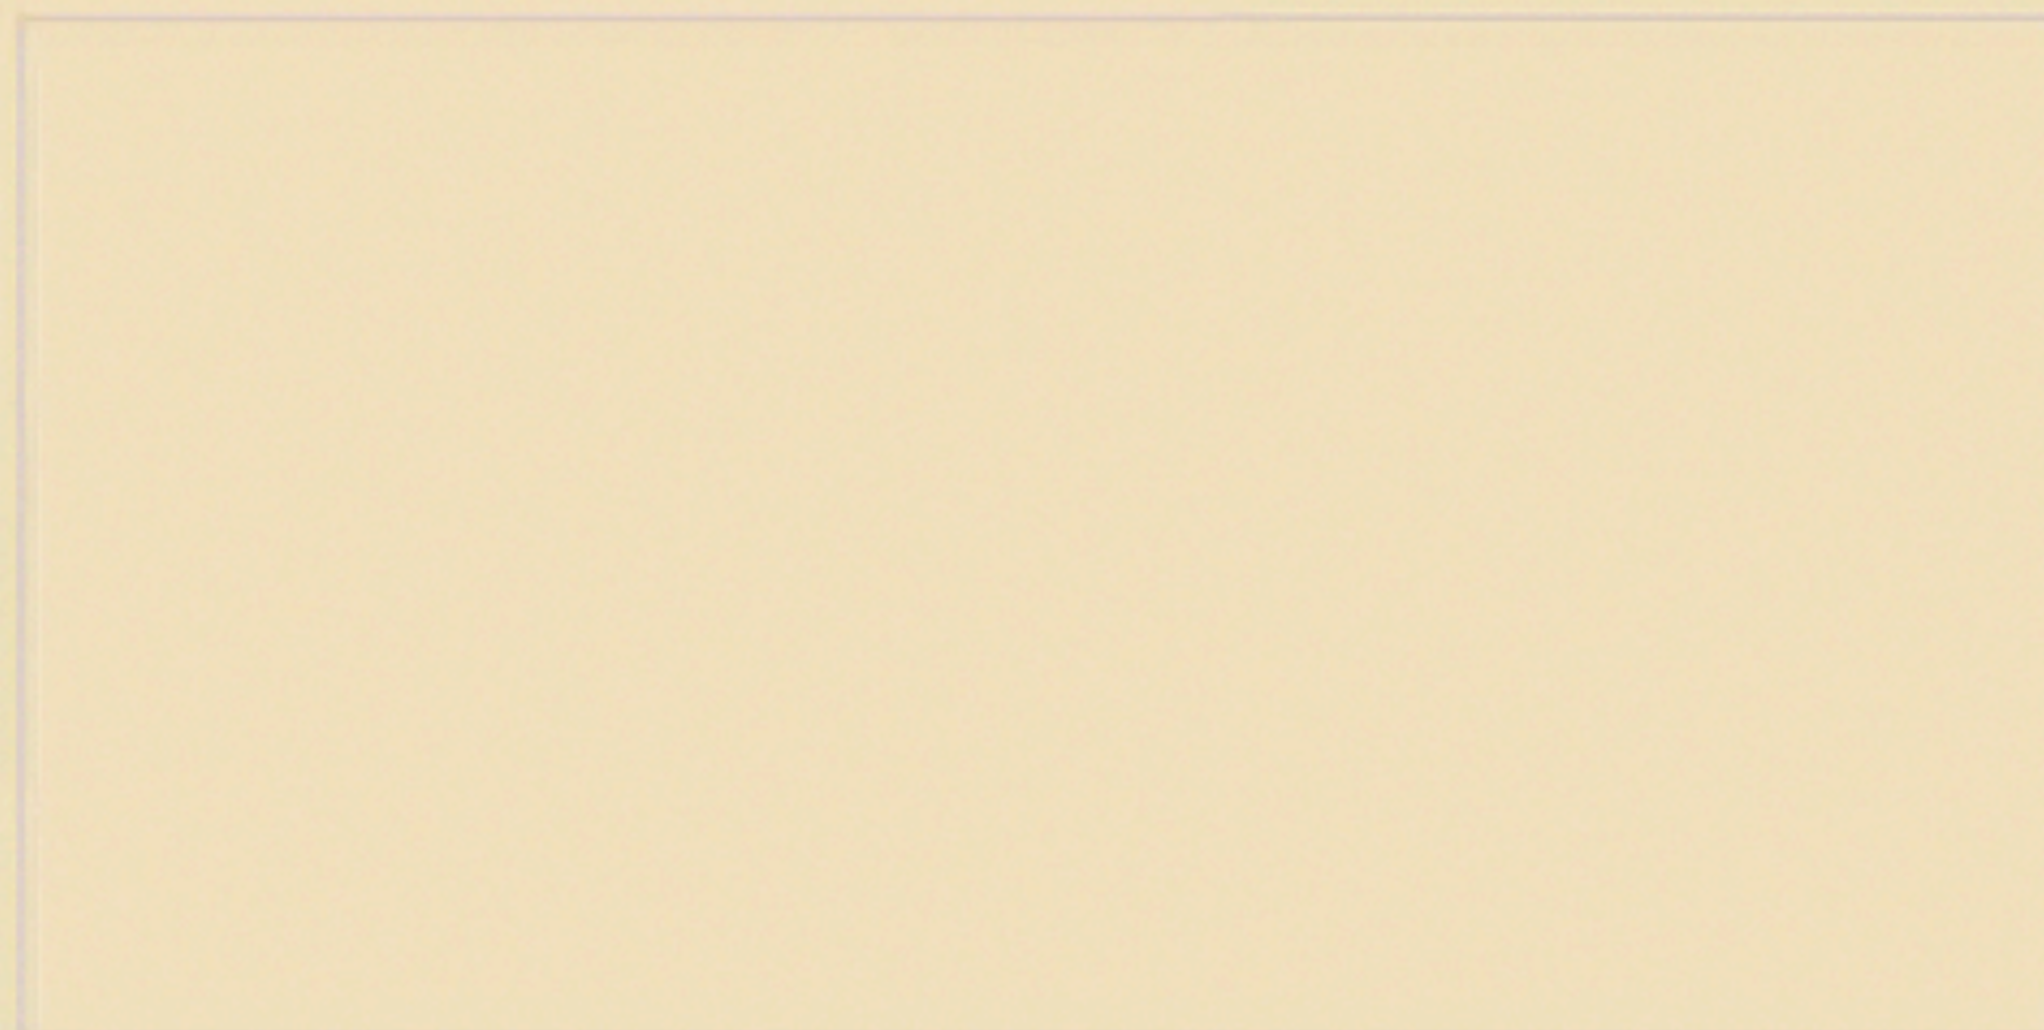

- HTML + CSS + JavaScript =
  - Interactive web page
  - Upload images, create composite!

# Green Screen!
