1. You are planning to add CSS to a web page that was written with HTML and has lists on the page. What new formatting option will you gain by including CSS?

- ☐ Create a list with bold text.
- ☐ Nest a list inside another list.
- ☒ Change the color of all lists to a different color easily.

Correct

This is correct! You can use CSS style commands to change the color of all lists and then with one word changed, change the color to a different color.

- ☐ Add links to words in the list.

2. You are planning to add CSS to a web page that was written with HTML and has images on the page. What new formatting option will you gain by including CSS?

- ☐ Put an image into a cell in a table.
- ☐ Insert an actual image into the web page instead of just a link to an image somewhere else on the web.
- ☒ Change the size of all the images on a web page to the same size.

Correct

This is correct! Using a CSS style you can specify one size that is applied to all images on a web page.

- ☐ Make it possible to click on an image and go to another website.

3. Using CSS, which one of the following is the correct way to change the h2 header to be blue and underlined?

- ☐

```
1 <h2 color:blue text-decoration:underline>
```
- ☒

```
1 h2 {  
2   color : blue;  
3   text-decoration: underline;  
4 }
```

Correct

This is the correct answer. Curly braces are needed and then each property is followed by a colon, its value and then a semi-colon.

- ☐

```
1 <h2 color=blue text-decoration=underline>
```
- ☐

```
1 h2 {  
2   color = blue;  
3   text-decoration = underline;  
4 }
```

4. Consider the following lists created with HTML.

Fruit

- grapes
- banana
- kiwi

Vegetables

- broccoli
- spinach

Which of the following CSS choices will turn only the list items for Vegetables (both broccoli and spinach) to green as shown below?

- ☐

```
1 ol li {  
2   color : green ;  
3 }
```

Un-selected is correct

- ☒

```
1 ul li {  
2   color : green ;  
3 }
```

Correct

This is a correct answer. This CSS specifies to change the text color of the li items of unordered lists only.

- ☐

```
1 li {  
2   color : green ;  
3 }
```

Un-selected is correct

- ☐

```
1 ol {  
2   color : green ;  
3 }
```

Un-selected is correct

- ☒

```
1 ul {  
2   color : green ;  
3 }
```

Correct

This is a correct answer. This CSS specifies to change the text color of all items of unordered lists only.

5. Suppose I already have a particular list in a table and I want to center this list using CSS. In the HTML file for each of the list items in this list I write the following (with text-here replaced by the actual item for the list item).

```
1 <li class="abc"> Text here </li>
```

Which one of the following statements is true about the CSS needed to center this list in the table?

- ☐ In your web page's CSS, you need to add:

```
1 li abc {  
2   text-align: center;  
3 }
```

- ☐ In your web page's CSS, you need to add:

```
1 li {  
2   text-align: center;  
3 }
```

- ☐ In your web page's CSS, you need to add:

```
1 ul li {  
2   text-align: center;  
3 }
```

- ☐ No additional CSS is needed.

- ☒ In your web page's CSS, you need to add:

```
1 .abc {  
2   text-align: center;  
3 }
```

Correct

This is the correct answer. This refers to the class abc and indicates the list item should be centered.
