Quiz, 10 questions

1 point	1.	can be represented as a String.
		Which one of the following is the <u>least</u> likely change to the LogEntry class to accommodate this new part of a web log?
		The <b>toString</b> method is modified to include a String parameter.
		A new private variable named <b>priority</b> is created.
		A new String field is initialized in the constructor.
		The <b>toString</b> method is modified to include the new priority as part of the return String.
		A new String parameter is added to the constructor.
		A new <b>getPriority</b> method is created to return the priority.
1	2.	Consider the following code for the <b>readFile</b> method of the <b>LogAnalyzer</b> class.
point	۷.	<pre>public void readFile(String filename) {     FileResource fr = new FileResource(filename);</pre>
		for (String line : fr.lines()) {  LogEntry le = WebLogParser.parseEntry(line);  }
		6 }
		In the <b>Tester</b> class, <b>readFile</b> is called with a correct filename, and then <b>printAll</b> is called, but nothing is printed.
		Which one of the following is likely the best reason why?  In <b>readFile</b> , a <b>System.out.println</b> statement is missing that should be right
		after the for loop.
		In <b>readFile</b> , the wrong parameter is sent to <b>parseEntry</b> .
		In <b>readFile</b> , a <b>System.out.println</b> statement is missing from the body of the
		for loop.  In <b>readFile</b> , the log entries were not stored in <b>records</b> .
		In <b>readFile</b> , a <b>System.out.println</b> statement is missing that should be right
		before the for loop.
1	3.	Consider the following code for the method <b>printAllHigherThanNum</b> with one integer
point	O1	parameter <b>num</b> . This method should print all the logs that have a status code higher than <b>num</b> .
		Which one of the following would be the best choice for suitable code for this method?
		<pre>1 if (le.getStatusCode() &gt; num) { 2   for (LogEntry le : records) { 3     if (le.getStatusCode() &gt; num) { 4         System.out.println(le);</pre>
		5 } 6 } 7 }
		<pre>1 if (le.getStatusCode() &gt; num) {</pre>
		<pre>for (LogEntry le : records) {     System.out.println(le);     4 } </pre>
		1 for (LogEntry le : records) {
		<pre>if (le.getStatusCode() &gt; num) {     System.out.println(le);     }     else {</pre>
		<pre>6    System.out.println(); 7  } 8 }</pre>
		<pre>1 if (le.getStatusCode() &gt; num) { 2  for (LogEntry le : records) {</pre>
		<pre>3</pre>
		<pre>6 else { 7    System.out.println(); 8 }</pre>
		<pre>1 for (LogEntry le : records) { 2   if (le.getStatusCode() &gt; num) {</pre>
		<pre>3     System.out.println(le); 4    } 5 }</pre>
1 point	4.	Run the method <b>countUniqueIPs</b> on the file <b>weblog2_log</b> .
	4.	How many unique IP addresses are in the file?
	4.	
	<ol> <li>4.</li> <li>5.</li> </ol>	How many unique IP addresses are in the file?
point		How many unique IP addresses are in the file?  45
point		How many unique IP addresses are in the file?  45  Run the method uniqueIPVisitsOnDay("Sep 27") on the file weblog2_log.
point		How many unique IP addresses are in the file?  45  Run the method uniqueIPVisitsOnDay("Sep 27") on the file weblog2_log.  What size is the ArrayList that is returned?
point		How many unique IP addresses are in the file?  45  Run the method uniqueIPVisitsOnDay("Sep 27") on the file weblog2_log.  What size is the ArrayList that is returned?
point 1	5.	How many unique IP addresses are in the file?  45  Run the method uniqueIPVisitsOnDay("Sep 27") on the file weblog2_log.  What size is the ArrayList that is returned?  8  Run the method countUniqueIPsInRange(400,499) on the file weblog2_log.
point 1	5.	How many unique IP addresses are in the file?  45  Run the method uniqueIPVisitsOnDay("Sep 27") on the file weblog2_log.  What size is the ArrayList that is returned?  8  Run the method countUniqueIPsInRange(400,499) on the file weblog2_log.  What number is returned?
point  1 point	5.	How many unique IP addresses are in the file?  45  Run the method uniqueIPVisitsOnDay("Sep 27") on the file weblog2_log.  What size is the ArrayList that is returned?  8  Run the method countUniqueIPsInRange(400,499) on the file weblog2_log.  What number is returned?  23  Run the method mostNumberVisitsByIP after a HashMap has been created from the
