Using HTML \leftarrow Practice Quiz, 5 questions

Congratulations! You passed!

Next Item

Consider the following simple HTML file shown below.

1 - <html> 2 <title> Birds </title> 3 **-** <body> 4 <h1> Eagles </h1> 5 </body> 6 </html>

web page? This:

file

Birds

Which of the following choices is the most likely for how this file would be displayed as a

Birds

Eagles

This:

Eagles

"Eagles" is shown as a header on the page.

Correct

X

Eagles

Birds Eagles

This is the correct answer. The word "Birds" is shown in the title bar and the word

This:

This:

Consider the following line from a web page:

Birds

points

italics, and "Coupons online," is also shown in bold. The rest of the words have no bold or emphasis.

Time for Back to School, SALES GALORE!, Coupons online, open early

1 - Time for Back to School, 2 <em b> SALES GALORE! </em b> , 3 Coupons online,

As you can see, "Back to School," is shown in bold, "SALES GALORE!" is shown in bold and

1 - Time for Back to School,

Which of the following is the HTML to generate this line?

open early

```
2 <em> SALES GALORE! </em> ,
       3 Coupons online, </b>
       4 open early 
Correct
```

both bold and emphasized.

1 width="75%"

.jpg"

1

.jpg"

1 <img width="75%"

3

3

1 <img "75%"

1 - Time for Back to School, 2 - SALES GALORE! , 3 - Coupons online, 4 open early

This is the correct answer. Here the starting and ending tags are nested

inside the bold starting and ending tags, so "SALES GALORE!" should appear as

```
1 -  Time for <b> Back to School, </b>
2 <em> SALES GALORE! </em> ,
3 <b> Coupons online, </b>
4 open early
```

Which of the following is an example of the correct way to display an image in HTML?

2 src="http://www.savethecat.com/wp-content/uploads/2015/06/cats

2 src="http://www.savethecat.com/wp-content/uploads/2015/06/cats

2 src="http://www.savethecat.com/wp-content/uploads/2015/06/cats

points

2 "http://www.savethecat.com/wp-content/uploads/2015/06/cats.jpg" />

```
.jpg" />
This is the correct answer. Both width and src options appear inside the brackets
```

1 To search for a picture of a cat, you could use the search engines

This is the correct answer. The word "google" is between the starting anchor tag

2 google or 3 bing points

Correct

water

• fruit juice

orange apple o mango

1 -

6 =

10

1 -

4 -

1 -

closing

2 water

7 orange 8 apple 9 mango

tea

http://www.bing.com.

and the ending anchor tag, so it should be a clickable link to the site http://www.google.com. Note that there is no word between the second starting anchor tag and ending tag, so there is no word to click on for the link to

Only the word "bing" is a clickable link.

with HTML using two lists, one nested in the other list.

Consider the following text that is part of an HTML file.

Only the word "google" is a clickable link.

5.

Both the words "google" and "bing" are clickable links. Consider the following list of drinks displayed on a web page that has been constructed

None of the words in the HTML above will be clickable links.

points

3 tea 4 fruit juice 5

```
2  water 
3 tea 
4 → truit juice
5 orange 
6 apple 
7 mango 
8 
9 
1 - 
2  water 
3  tea
```

```
5 fruit juice 
6 orange 
7 apple 
8  mango 
9 
10 
1 - 
2  water 
3  tea 
4 fruit juice 
5
    orange 
6
    apple
```

mango

```
2  water 
      3  tea 
      4 - fruit juice
      5 = 
      6 orange 
      7 apple 
      8  mango 
      9 
     10 
     11 
Correct
This is the correct answer! The HTML includes a second list nested that describes
```

different types of fruit juices. All the tags and items in that list appear before the
