Course Programming Resources

The BlueJ Environment download, documentation, and programming resources are available at:

http://www.dukelearntoprogram.com/course4/index.php

Please Note! If you have already downloaded a version of BlueJ that you did not download from DukeLearnToProgram, you will need to uninstall and download this one to get the edu.duke package.

In addition, BlueJ has provided a playlist of videos explaining some key Java terminology and how to use BlueJ:
https://www.youtube.com/playlist?list=PLYPWr4ErjcnzWB95MVvlKArO6PIfv1fHd .

Download BlueJ

From the above linked DukeLearnToProgram page, click on "Download BlueJ Environment" (http://www.dukelearntoprogram.com/downloads/bluej.php). Follow the relevant instructions for your device's operating system (Windows, Mac, or Linux). Note that on a Mac, you may want to move the BlueJ application to your "Applications" folder.
